**37<sup>TH</sup> ANNUAL DINNER**

**MESSAGE FROM IR. PROF. DATO' DR. CHUAH HEAN TEIK**

**PRESIDENT  
THE INSTITUTION OF ENGINEERS, MALAYSIA**

It gives me great pleasure to put down a few words in the Southern Branch Annual Dinner Souvenir Program 2010. I would also like put on record my sincere appreciation to the Organising Committee who has spent a lot of time in organising this auspicious event.

My heartiest congratulations too to the Southern Branch for a very successful session and for the initiatives in organising so many successful activities at

the Branch level.

IEM now has 11 Branches of which 9 of these Branches are based in the Peninsular and 3 in East Malaysia to take care of the interest of the members in these regions. As IEM's President, I believe that the interest of the Branches and the matters at the National Head Office carry equal weight. Nevertheless the Branch Committee could be active in its own region providing support services to the members residing in the area to which the National Office is unable to provide.

I also believe that relationship can be immeasurably strengthened though personal interactions between National Office and the Branch and between members and Branch at very activities being organised. Thus, the extensive people-to people-link are especially important.

Engineers built the best infrastructure to connect people. Engineers are forefront runners to build facilities to move our Nation into a developed status. Engineers play a tremendous role in nation building and is indispensable to the country and our quality of life. In light of the ever-changing qualities needed for development, Engineers must always be prepared to deal with advanced technologies, accommodate and work with other disciplines, accept new engineering disciplines and face new challenges ahead.

I truly appreciate the contribution of our members, both at the National and Branch levels, in working to advance our country's progress. Your efforts contribute to a brighter future and embody the spirit of engineering innovation.

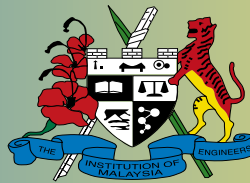

Finally, I hope that our proactive efforts will continue in the future so as to ensure the continued success of our beloved profession.

Thank You and with warmest regards,

**IR. PROF. DATO' DR. CHUAH HEAN TEIK** FIEM, P.Eng

### MESSAGE FROM IR. MOHD KHIR BIN MUHAMMAD

**CHAIRMAN  
THE INSTITUTION OF ENGINEERS, MALAYSIA  
(SOUTHERN BRANCH)**

Assalamulaikum wbt. and a very Good Evening,

On behalf of the Institution of Engineers Malaysia (Southern Branch), it gives me great pleasure to welcome all of you to our 37<sup>th</sup> Annual Dinner this year.

We are indeed honoured this year to have the presence of HRH Sultan Ibrahim Ibni Almarhum Sultan Iskandar and HRH Raja Zarith Sofiah Binti Almarhum Sultan Idris Shah to grace our occasion. On behalf of the IEM (Southern Branch), I would like to express my sincere gratitude and appreciation for the privilege granted.

I would also like to thank the Chief Minister of Johor, Y.A.B. Dato' Haji Abdul Ghani bin Othman and his wife Datin Paduka Prof. Dr. Jamilah Ariffin as well as all our distinguished guests for being with us this evening.

As professionals, engineers have an important role in performing our duties and responsibilities with competence and integrity. We should put the public interest in high priority with strong obligations towards community engagement and outreach. In addition, we have the responsibility to ensure that our actions and activities would not cause undue harm not just to the public but also to the environment at large. We are obliged to show interest and sensitivity to community concerns and, most importantly be open and transparent about our activities, while facilitating open discussions on current issues of importance. As such, our job requires a high standard of ethical conduct and contribution to the public and this is our promise to the Nation.

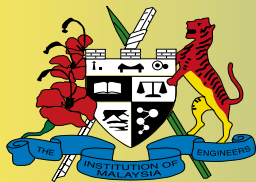

Let us strive to abide by these principles to propel us forward. Ahead of us is an increasingly challenging and competitive global environment. Our task is to ensure that IEM will meet the needs and expectations of an evolving engineering society. On behalf of my engineering fraternity, I can promise that IEM will continue its commitment in bringing the engineering profession to greater heights. We will move forward to extend and strengthen our expertise and contribution around the globe, in the interest of mankind and members of our profession.

I call upon all members to give your utmost support and sincere commitment to enable IEM to sustain its long established tradition of excellence for the betterment of the Institution, our profession and above all, our Nation.

Thank you and with warmest regards,

**IR. MOHD KHIR BIN MUHAMMAD**, FIEM P.Eng

## IEM (Southern Branch) *Academic Award '10 Winners*

The Institution of Engineers, Malaysia (Southern Branch) has once again recognized the achievements of students in primary and secondary schools particularly among the children of IEM members.

As in previous years, the selection of suitable recipients is not based in academic performance alone, but also in the overall standing behaviour, achievements, merit and personal traits of prospective recipients.

This year, the number of application is encouraging and on the 21st May 2010, the Committee have reviewed the submissions and approved the following applicants for the Academic awards:

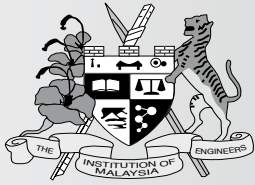

### UPSR '09

Student's Name	Prize	Highest Academic Result	School/Extra-Curricular Activities
<b>Ong Yew Fung (A.W.)</b> SJKC Foon Yew 5, Pasir Gudang, Johor <b>Nominated by Engr. Ong Eng Hock, Grad. IEM and Ir. Calvin Tey Choo Yew</b>	Certificate & RM 50	<b>UPSR'09 – 7A</b>  B.Melayu (Comprehension) – A B.Melayu (Composition) – A English Language – A Mathematics – A Chinese (Comprehension) – A Chinese (Composition) – A Science – A	- Chairman of Badminton Club - School Prefect in 2009 - Member of Resource Centre and Badminton Club - Participated in Quiz Competition, Pasir Gudang MSSM Badminton Carnival and Mathematics Olympiad
<b>Mok Ying Jie (A.W.)</b> SJKC Pandan <b>Nominated by Engr. Mok Tai Juan, Grad. IEM and Engr. Leong Men Ling, Grad. IEM</b>	Certificate & RM 50	<b>UPSR'09 – 7A</b>  B.Melayu (Comprehension) – A B.Melayu (Composition) – A English Language – A Mathematics – A Chinese (Comprehension) – A Chinese (Composition) – A Science – A	- Active in Brass Band - Participated in Interschool/Interdistrict Swimming Competition, Calligraphy Competition, "Choral Speaking" Competition, Essay Competition and "Story Telling" Competition - Pass Piano Grade 4 in August 2009
<b>Siti Amirah Binti Abd. Rahim (A.W.)</b> Sek. Keb. Taman Daya 2 <b>Nominated by Ir. Abd. Rahim Bin Abd. Latiff</b>	Certificate & RM 50	<b>UPSR'09 – 5A</b>  B.Melayu (Comprehension) – A B.Melayu (Composition) – A English Language – A Mathematics – A Science – A	- Chairman of Tunas Girl Guides - Vice Treasurer of Handball Club - Member of English Club - Participated in National Level Primary School Uniformed Bodies Camp (Girls), English Recreational Camp with Mommy Deebea, Minds Program UPSR 2009, Bahasa Melayu Carnival (Johor Jaya Zone) and Tadarrus Al-Quran in Maal Hijrah Celebrations - Prefect in 2007 and 2008
<b>Muhammad Najib Bin Fauzi (A.W.)</b> Sek. Sri Johor Bahru <b>Nominated by Ir. Fauzi Bin Hashim</b>	Certificate & RM 50	<b>UPSR'09 – 5A</b>  B.Melayu (Comprehension) – A B.Melayu (Composition) – A English Language – A Mathematics – A Science – A	- Active in Football - Participated in 2 <sup>nd</sup> MSSIK Seri/Semi Yayasan Takmir Pendidikan (Football/Sepak Takraw) and Tadarus Al-Quran (South City Zone) - Member of Mentors and Peers
<b>Lee Ching Tong (A.W.)</b> Sek. Keb. Infant Jesus Convent, Johor Bahru <b>Nominated by Ir. Lee Wai Hin, Roger</b>	Certificate & RM 50	<b>UPSR'09 – 5A</b>  B.Melayu (Comprehension) – A B.Melayu (Composition) – A English Language – A Mathematics – A Science – A	- President of Computer Club - Participated in The Jogathon and Carnival

## *The Institution of Engineers, Malaysia*

IEM is a society established to promote science and profession of engineering in any or all its disciplines and to facilitate the exchange of information and ideas related to engineering.

### **Our Vision**

The Institution of Engineers Malaysia aims to be the premier professional organization pivotal to Malaysia achieving Vision 2020.

### **Our Mission**

- IEM shall promote sound professional engineering practices in support of the socio-economic development objectives of the nation.
- IEM shall service the needs and interests of its members and the public and uphold the social standing and images of the engineering profession.
- IEM shall contribute towards nation building and shall strive to enhance society's consciousness of science and technology.

### **Our Objectives**

The objects of the Institution as set out in the Constitution shall include the following:

- to hold meetings, exhibitions and visits, and such other activities as the Institution may deem incidental or conducive to the promotion or attainment of the profession of engineering;
- to raise the character and status and advance the interests of the profession of engineering and those engage herein;
- to promote honourable practice and professional etiquette among members of the Institution;
- to communicate to members information on all matters affecting the profession of engineering and to print, publish, issue and circulate such publications as may seem conducive to any of the objects of the Institution; and
- to do such other things as the Institution may think incidental or conducive to the attainment of the objects of the Institution.

# THERMO-SHIELD®

## Fluid Applied Ceramic Roof and Wall Coatings

### BENEFITS OF THERMO - SHIELD®

- Water proofing
- Easy maintenance
- Hot and cold resistance
- Chemical resistance
- Economical
- Non-toxic
- Class - A Fire rating on roof coating
- Anti-corrosion
- Long lasting
- Fade resistance
- Heat reduction
- UV resistant
- Elastic

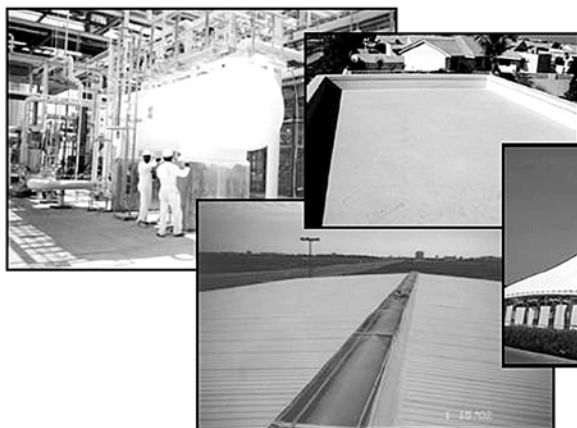

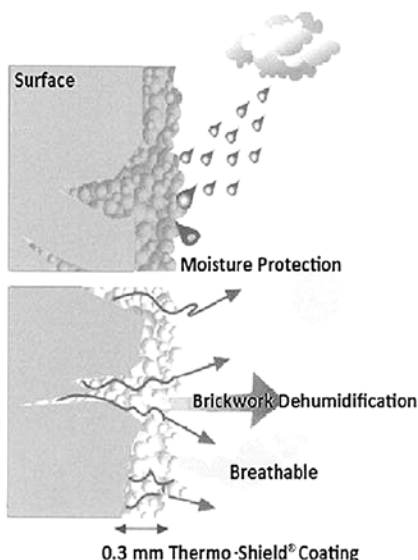

### What Is Thermo-Shield®?

Thermo-Shield® ceramic coating consists of fluid-applied Acrylic elastomeric coatings which contain Ceramic Microspheres.

Thermo-Shield® is an innovative long lasting protection technology combining strength, lightweight protection and integral insulation.

### HOW IT WORKS

The polymers used in Thermo - Shield® ceramic coatings expand when wet, offering unexcelled protection against damaging moisture penetration. The polymers shrink when dry, allowing any trapped moisture buildup to safely escape to the atmosphere. This unique feature helps prevent blistering.

### Vast Area of Thermo-Shield® Applications:

- Asbestos Roof
- Exterior Wall
- Gutter
- Metal Sheet
- Storage Tank
- Slab Roof

High Performance Buildings for Life

## Integrated systems

- No two buildings are completely and consistently the same. Each block of building would most probably have its individual cooling requirements. Trane specializes in customizing according to your specific requirements to offer the best integrated solution for our customer.
- Trane prides itself in its centrifugal and Helical Rotary Chillers which are well respected in the industry. The system ensures high efficiency cooling in a wider working range as well as stable operation. It also helps materialize the application of multi-level energy-saving solutions.
- A unique control system which has gone through years of development and practical testing blends perfectly to provide your building the best possible energy-saving solutions.
- Our highly professional team in installation, testing and balancing will be on hand to handle of monitoring and control of the entire process in order to ensure "the achievement of target objectives or even exceed promised results".

# ENVIRONMENTAL FRIENDLY AND EFFICIENT PILING SYSTEM

## SILENT

piling without noise pollution

## VIBRATION FREE

eliminates the risk of damage to adjacent buildings

## VERSATILE

side-jacking allows for piling at confined areas

## MULTI PURPOSE

the machine itself acts as kentledge for load test

## SPEEDY

jacking speed of up to 5.6 metres per minute

## PRACTICAL

on board crane allows for self hoisting of piles

## MOBILE

generator attached to machine allows for mobility on site

## EXPEDIENT

customized pile-cutter and CO2 welding provides speed & safety

## Our Range Of Piling Machines

**800 tons Hydraulic**  
Jack-in machines with crane.

**600 tons Hydraulic**  
Jack-in machines with crane.

**380 tons Hydraulic**  
Jack-in machines with crane.

**250 tons Hydraulic**

UCO Cell / UCO Decocell

UCO SolidWall System  
used for hotel rooms

UCO Duravent  
used as eave lining

## the NAME you can TRUST

At UAC, we believe in product innovation and excellence, which is why we are first in many ways. In 1984, we introduced UCO Superflex, the first asbestos-free flat board in Malaysia and Asia, and UCO Duravent, the first slotted eaves lining. In 1994, we became the first Malaysian manufacturer in the fibre cement building products industry to be accredited the ISO 9001:2000 Quality System. In fact, our track record dates back to 1963.

Through continuous development, our innovations now extend beyond flat board to include corrugated roofing sheet, patterned boards, slotted eaves lining, wood grained plank and panel products, lattice and flush-jointable flat board. We have taken great pains to ensure that quality, technology and innovation is never compromised so that you, our customers, are always ensured the best.

For the better building products,  
you can count on UAC.

UCO Lattice  
used as screen

UCO Shingles  
used as roof sheet

UCO Superflex Board  
used as fascia

UCO Plank - Smooth and Sedartex  
used as cladding and sidewall

UCO Vistabord / Flexabord / Multiflex  
used for fascia and columns

UCO Panel Superflex  
used as external wall cladding

**Injection / Jack in Piling System** -TOTALLY VIBRATION & NOISE FREE to the surroundings.

**Micro Bore Piling System** is very VERSATILE and also non vibration & noise.

**Free Drop Hammer and Hydraulic Hammer Piling System** – most common and cheap.

# EMBRACING ECO-FRIENDLY TECHNOLOGY SOLUTIONS FOR OUR RESOURCES

Business technology currently enhances our stance as the premier water treatment and supplier in Malaysia.

Continuously serving each and every constituent in the State of Johor, technology solutions has systematically and comprehensively managed our water quality programme ensuring 100% coverage to our customers, reduction of non-revenue water (NRW) by 12% annually, reduction of the billing cycle and improving collection.

SAJH holds ISO certification for Quality Management, Water Treatment Plants and Central Laboratory and is also the recipient of the **Malaysian Water Association's Outstanding Award for Management** and winner of **"Best Workplace Practice"** in the Asian Corporate Social Responsibility (CSR) Awards 2005.

[www.saj.com.my](http://www.saj.com.my)

# G-PILE HYDRAULIC JACK-IN PILING SYSTEM

## TECHNOLOGY FOR THE ENVIRONMENT: NO POLLUTION, VIBRATION & NOISE

G-Pile Hydraulic Jack-In Piling System produced by G-Pile Sistem Sdn Bhd (A subsidiary of CSC Holdings Pte Ltd Singapore), is an innovative foundation system. The system is specially designed to meet various foundation and environmental needs. It provides many superior advantages as compared to the conventional piling system currently in use.

### G-PILE HYDRAULIC JACK-IN PILING SYSTEM WORKS BETTER

G-Pile Hydraulic Jack-In Piling System utilizes the patented hydraulic grip jacking technique to inject the pile into the ground. This system can provide a maximum pile jacking capacity of 8000 KN. It meets the most stringent environmental protection requirement as it is virtually free of noise, pollution and vibration. It also has many other advantages, like superior mobility, excellent jacking ability, high level of operational accuracy and 100% quality check.

### WHY CHOOSE THE G-PILE SYSTEM?

- ✓ Cost
- ✓ Environment
- ✓ Confidence
- ✓ Durability

- We have currently sixteen (16) hydraulic jacking machines of various capacities ranging from 300 ton to 800 ton.
- Pre-stressed Spun Piles ranging from 250mm diameter to 700mm diameter.
- R.C Square Piles ranging from 250mm to 550mm.

### COST

G-Pile System is more cost effective than conventional piling systems. Significant operational cost savings can be achieved through the system's simple and rapid pile installation process and better productivity.

### ENVIRONMENT

Using the hydraulic jacking installation process, G-Pile System is practically free of noise, vibration or pollution. A particularly important advantages for regulated city zones and environmentally sensitive structures. Further, the work-site remains clean and dust free.

### CONFIDENCE

During installation, twice the working load is applied on the pile. Each pile is individually test loaded, the guesswork and uncertainty associated with the conventional system is therefore eliminated. This will ensure a high level of quality assurance.

### DURABILITY

No wasteful provision is needed in G-Pile System as compared to the conventional hammer-driven piling system.

In the case of bored pile or hammer-driven piles, tensile cracks normally occur due to impact and reflected stress waves as well as necking problem. However, these problems do not occur in the G-Pile System as it is more durable.

### BENEFITS:

- Free of noise, vibration and pollution; suitable for operation in urban or residential site.
- Can install a wide range of concrete pile sizes from 250mm x 250mm to 550mm x 550mm and spun piles from 250mm to 700mm diameter.
- Instantaneous pile tension test can be conducted.
- Easy movement: X-Y direction and rotation.
- Wide base, low centre of gravity and stable; suitable for various types of ground condition.
- Easily dismantled for transportation.
- Pile jacking load is applied continuously and evenly, without hammering and vibration.
- Able to handle individual cast pile length exceeding 12m. Thus, reducing the number of welding joint.
- No heavy reinforcement needed for the pile as compared to hammer-driven system.
- Excellent piling accuracy.
- Ease of operation and maintenance.

# BLUESCOPE STEEL (MALAYSIA) SDN BHD

BLUESCOPE STEEL MALAYSIA, WHICH BEGAN OPERATIONS IN 1996, IS THE ONLY LOCAL MANUFACTURER OF BOTH ZINCALUME® AND TRUECORE® ZINC/ALUMINIUM ALLOY-COATED STEEL AND CLEAN COLORBOND® PREPAINTED STEEL. OUR PRODUCTS OF PREMIUM QUALITY AND PERFORMANCE ARE DERIVED FROM CONTINUAL PRODUCT RESEARCH AND DEVELOPMENT IN AUSTRALIA.

*clean* Colorbond®

Zincalume®

TrueCore®

In ensuring quality, stringent tests are conducted regularly for all our products prior to introducing it to the market. In addition, BlueScope Steel Malaysia is also accredited with the Quality Management System ISO 9001 and Environmental Management System ISO 14001 by UKAS.

Our products of superior quality are widely used in the building and manufacturing industry of Malaysia, Singapore, Brunei and South Africa. The availability of locally manufactured Clean COLORBOND® steel, ZINCALUME® steel and TRUECORE® steel is a dynamic representation of our products towards a quality lifestyle.

COLORBOND®, ZINCALUME® and TRUECORE® are registered trade marks of BlueScope Steel Limited. Copyright © 2010 by BlueScope Steel (Malaysia) Sdn Bhd. All rights reserved.

## A Specialist in Polyethylene Engineering Products

Water storage to provide constant water supply. Available in wide range of sizes, shapes and configurations.

### **POLYSEPT<sup>®</sup>** SEPTIC TANK

Efficient and reliable solution to domestic sewage treatment. Leakproof, one piece seamless septic tank for fast and easy installation.

### **FLOLINE 3-W** TRIPLE WALL PROFILED HDPE PIPE

Large diameter pipe for use as culverts, drainage and waste water conveyance. Custom-made flap-gate flood control system with self operating mechanisms.

### **WEIDA<sup>®</sup>** DOUBLE WALL CORRUGATED HDPE PIPE

Ideal for underground or aboveground gravity and low-pressure applications in the civil works and waste management sectors.

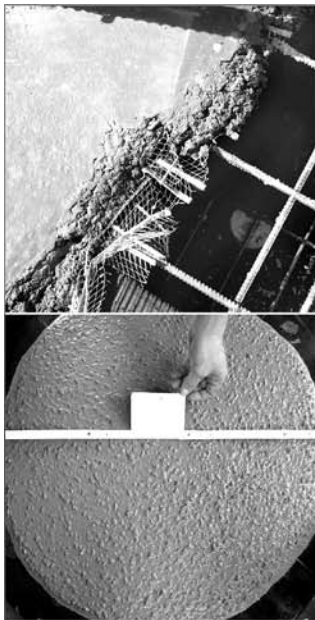

### **WEIDALINE<sup>®</sup>** SUBSOIL DRAINAGE PIPE

Effectively drains excess water away from any area to prevent water logging

300 tonnes of **MC-Bauchemie's Centrilit Fume SX**, a reactive silica gel slurry, used in production of High-Performance Concrete for the Lot 171 Project, KLCC. ►

**World leaders in specialist technologies for :**

- Concrete Production
- Concrete Repairs
- Concrete Protection
- Concrete Enhancement

## Solutions for High-Performance Concrete

Silica fume particles, being 50 to 100 times smaller than cement particles, are able to fill the voids between cement particles more or less completely leading to denser, more durable concrete. However, good dispersion throughout the matrix is difficult to achieve with densified powder material. **MC-Bauchemie's Centrilit Fume SX** technology, supplied as a reactive silica gel slurry, optimises the benefits of silica fume for greatly improved concrete properties while improving safety and efficiency in concrete production.

- Highly efficient dispersion for increased concrete density and durability
- Improved cohesion for easier pumping
- Improved adhesion to substrates and reinforcements
- Reduced mixing times in production
- Safe for handling (dust-free)
- Reduced equipment abrasion

## Slope stability problems ?

# Think TenCate geosynthetics!

For every problem there's a practical solution from the world's leading geosynthetics solutions provider.

No location is too remote. No problem is too big, or too complex. TenCate offers a wide range of high quality solutions supported by an experienced professional technical team, and backed by exhaustive performance testing in leading research institutes worldwide.

TenCate geosynthetics are designed to perform in a wide variety of soil and engineering conditions. Whatever the problem, there's a cost effective TenCate solution available. All materials delivered to site are designed to withstand robust site and operative conditions and are quality assured by testing in an accredited geosynthetics testing laboratory. Solve your slope stability problems by simply calling TenCate.
