FOREWORD

Y.A.B. DATO' DR. SAHRUDDIN BIN HAJI JAMAL MENTERI BESAR JOHOR

It is an honour for me to pen down a few of my thoughts for this significant event which is the Institution of Engineers Malaysia (Southern Branch) 46th Annual and Awards Dinner 2019.

I would like to acknowledge my appreciation to the organizers, members and engineers who contributed to the success of this pivotal event for IEM (Institution of Engineers, Malaysia).

Johor being in its strategic location has an important role in the socio-economic development agenda as part of its contribution to the development of Malaysia.

The new Johor State Government administration under Pakatan Harapan (PH) is committed to the trust given by the Johoreans in improving its people's liveability, efficient management of state affairs and also addressing pertinent matters concerning the health and safety of the people.

Aligned with this, there is much benefits in collaborating with engineers as a whole to push Johor into an epitome of modernization in terms of technology advancement, structure and infrastructure development that is comparable with its neighbouring countries such as Singapore and perhaps in the near future, the Southeast Asia.

There is a saying to conquer a journey begins with a single step. No doubt there are room for improvement in many areas but I believe every step of improvements will go a long way for Johor to be a recognizable powerful economic force.

In today's competitive world I believe that local engineers are the key players in ensuring a better standard of life not only through their contributions to the country but through their continuous engagement to find ways to place Johor as a holistic and developed state,

I am appreciative of IEM (Southern Branch) who is always willing to lend its support to the development and welfare of the state.

Along this line, I would like to call upon all engineers to stand side by side to join me to develop Johor for the better future that lies ahead.

I wish you all every success in your future endeavour and embrace utmost professionalism and vigilance in carrying your duty to the country and to the public at large. Thank you.

YAB DATO' DR. SAHRUDDIN BIN HAJI JAMAL

MESSAGE FROM PRESIDENT THE INSTITUTION OF ENGINEERS, MALAYSIA

It gives me great pleasure as President of the Institution of Engineers, Malaysia to put down a few words in the IEM Southern Branch Annual Dinner & Awards Night 2019 Souvenir Programme Book.

Our membership throughout the nation has grown in recent years and this development has brought tremendous challenges to our IEM branches to keep pace with the increasing number of members in the states and of their expectations. It is therefore important that we now expand our attention on upgrading and enabling our Branches to provide the necessary support and services to the increasing membership in the states.

I truly appreciate the contribution of our members, both at the National and Branch levels, in working to advance our country's progress. Your efforts contribute to a brighter future and embody the spirit of engineering innovation.

I am confident that the IEM Southern Branch will rise to meet any future challenges as it has done since the date of its establishment. Congratulations on all that the Branch has achieved in the past and I wish the Branch every success in the many decades that are yet to come.

Finally, I hope that our proactive efforts will continue in the future so as to ensure the continued success of our beloved profession.

Thank You and with warmest regards,

Ir. David Lai Kong Phooi President,
The Institution of Engineers, Malaysia

MESSAGE FROM CHAIRMAN THE INSTITUTION OF ENGINEERS, MALAYSIA (SOUTHERN BRANCH)

On behalf of The Institution of Engineers, Malaysia (Southern Branch), I would like to extend a warm welcome to everyone to our Annual Dinner and Awards Night, 2019. I would like to thank our distinguished guests for taking time off their busy schedule to grace the occasion.

Revolution 4.0 and digital technologies have the potential to change and shape an engineer's job radically. In the past, engineers only get to see the final "product" after it has been built. A "product" had to undergo many changes and rectifications during the construction phase. Today, with the aid of Building Information Modelling (BIM), engineers and architects are able to collaborate efficiently, and all design shortcomings and conflicts are dealt with during the design stages. With the BIM, engineers and architect are able to see their end products even before it is being built. This shift in digital technology has resulted in tremendous cost savings and time for both the clients and the consultants.

The government have initiated projects to build 10 million affordable houses over the next 10 years. This initiative has created an opportunity for engineers to participate and contribute to the government's goal. Engineers can get involved in the digital Industrialised Building System (IBS) which is a more efficient system in terms of time, quality and cost.

We cannot deny that profit making is the reason why we venture into businesses. However, the recent environmental pollution debacle in Pasir Gudang that affected the life and health of the people, not to mention the high cost incurred in the subsequent cleaning up of the pollutants, should serve as a wakeup call for us as engineers. With global warming and rise in pollution affecting the environment all over the world, each of us as engineer, has a responsibility and an important role to play in protecting the environment and leaving a legacy for the generation to come. To this end, engineers can contribute by designing more environmentally friendly and green buildings, including factories, designing more efficient systems to treat industrial wastes and providing effective monitoring systems.

Engineers should be encouraged to participate and work with relevant NGOs to educate the general public and school children by conducting relevant courses and seminars. It is only through technology and education that environmental problems can be contained and alleviated effectively in the long run.

The survival of engineers is not dependent solely on their intelligence and strength, but the ability of engineers to adapt to an ever changing environment and technology

Last but not least, I would like to express my gratitude to my fellow engineers and guests for your continuous support, and I look forward to a meaningful year of working with you. Enjoy the evening ahead.

Ir. TEO KIYUEE
Chairman
The Institution of Engineers Malaysia (Southern Branch)

UCO DECOWOOD

BETTER THAN TIMBER

UCO DecoWood is a durable wood-like strip made of fibre cement. Autoclaved in high temperatures for toughness and stability. UCO DecoWood is environmental friendly, termite-proof and weather resistant. It is ideal for both internal and external uses, and suitable for applications such as stair risers and treads, ceilings, feature walls, louvres, deckings and fences. UCO DecoWood is recommended to be painted to achieve a long-lasting natural timber look-alike finish.

MESSAGE FROM IEM (SOUTHERN BRANCH) ORGANISING CHAIRMAN

On behalf of The Institution of Engineer's, Malaysia (Southern Branch) and the Organising Committee, it gives me great pleasure to welcome you to our 2019 Annual Dinner & Awards Night.

It is an honour and privilege to be tasked to organize this Annual Dinner, a tradition of IEM (Southern Branch) where we gather once in a year.

I would like to express our sincere gratitude to all of you who have sacrificed your precious time to be present tonight to share in this joyous event. I would also like to thank all individuals and organizations for their support to The Institution by way of advertisements, sponsorship and good wishes.

May I convey my sincere gratitude to my very capable Organising Committee for their time, dedication and collective efforts in ensuring that this event will be a wonderful and memorable one for all of us. You know who you are and I am glad to have had you in my committee.

Lastly, I wish to thank IEM (Southern Branch) and Chairman Ir. Teo Kiyuee for the confidence to entrust me with this task of organising this function and hope that the Organising Committee and myself have lived up to the expectations. Do allow me to extend my sincere apologies should there be any deficiencies or short coming which may have befallen in the course of our duties.

We hope that you will have a wonderful, memorable and enjoyable evening.

Thank you!

Ir. Felix Lim Gee Zhiong
Chair, Annual Dinner Organising Committee

SIKA SOLUTIONS FROM BASEMENT TO ROOF

You may know us for just one skill area, but Sika has over 100 years of global experience in providing durable and high performance solutions for the key areas of construction.

Sustainability is a key component of the company's innovation drive. Sika aims to enhance durability and improve both energy and material efficiency for buildings as well as for industrial applications.

BUILDING TRUST

ITEM VISION AND MISSION

IEM is a society established to promote and advance the Science and Profession of Engineering in any or all its disciplines and to facilitate the exchange of information and ideas related to Engineering.

Our Vision

The Institution of Engineers, Malaysia aims to be the premier professional organisation pivotal to Malaysia achieving Vision 2020.

Our Mission

- IEM shall promote sound professional engineering practice in support of the socio-economic development objectives of the nation.
- IEM shall service the needs and interests of its members and the public and uphold the social standing and image of the engineering profession.
- IEM shall contribute towards nation building and shall strive to enhance society's consciousness of science and technology.

Our Objectives

The objectives of the Institution as set out in the Constitution shall include the following:

- to hold meetings, exhibitions and visits, and such other activities as the Institution may deem incidental or conducive to the promotion or attainment of the profession of engineering;
- to raise the character and status and advance the interests of the profession of engineering and those engaged therein;
- to promote honourable practice and professional etiquette among members of the Institution;
- to communicate to members information on all matters affecting the profession of engineering and to print, publish, issue and circulate such publications as may seem conducive to any of the objectives of the Institution; and
- to do such other things as the Institution may think incidental or conducive to attainment of the objectives of the Institution.

ACADEMIC AWARDS 2019 RECIPIENTS

The Institution of Engineers, Malaysia (Southern Branch) has once again recognized the achievements of students in primary and secondary schools particularly among the children of IEM Members. The selection of suitable recipients is not based on academic performance alone, but also on the overall standing achievements, merits and personal traits of the recipients. On 24th May 2019, the Committee has reviewed the submissions, and approved the following recipients for the 2019 Academic Awards of The Institution of Engineers, Malaysia (Southern Branch).

CITATIONS

EXCELLENCE IN CIVIL ENGINEERING CONSTRUCTION, LAND & MARINE PILING,
MARINE STRUCTURE AND JETTY & HARBOUR

Antara koh (M) Sdn Bhd is an affiliated company of Antara Koh Private Limited Singapore. Antara Koh (M) is a specialist contractor in land and marine piling, civil engineering and marine structure such as jetty, bridges and harbours.

Antara Koh (M) was registered on 31 December 1976. Antara Koh (M) also registered with Construction Industry Development Board Malaysia (CIDB) in the highest construction category grade of G7 which mean the capacity of tendering is unlimited.

Antara Koh (M) own and operate a wide range of heavy construction equipment and plants such as fixed leader Piling Barges, Reverse Circulation Drills and Large Diameter Down-The-Hole hammers. Antara Koh (M) continuously improve the usage of technology and resources to handle large and difficult jobs which are technically challenging.

Antara Koh (M) is certified for ISO 9001:2008.

We aim to continuously improve, promote and provide construction activities and services to the society at which we operate. By providing one stop construction design and build services, we aim to add value to our clients that in turn will be beneficial to the society at large. We will treat all partners including suppliers, subcontractors and consultants with trust, honesty and fairness in all business dealings.

Towards our employees, we balance our focus on their personal skill development while taking care of their welfare.

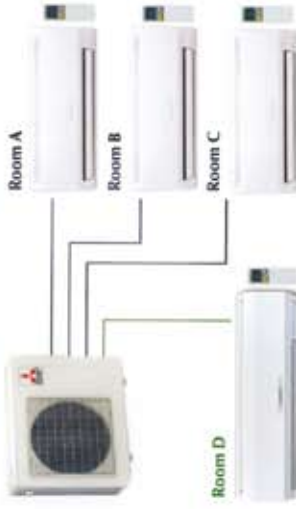

While seeking for the maximisation of shareholders' wealth, we strive to maintain harmony with the interest of the society to enhance our corporation's sustainability.

We aspire to be reliable, innovative and profitable provider of full range construction services and products in the South East Asia region.

CITATIONS

Hwa Hin Sdn Bhd is a Johor Building & Infrastructure Contractor.

The company was incorporated in Malaysia on 28th March 1983 as a private limited company to participate in the growth of the construction industry.

CIDB Registration : G7
ISO 9001 Certificate

Our principal business / activities are those of a general contract in the construction line specializing in the following fields :

- Factory
- Commercial Building
- Design & Build
- Infrastructure
- Highway & Interchange
- Bridge
- Earthwork

The Company currently holds a Grade 7 License registered with Construction Industry Development Board Malaysia (CIDB) of the following characteristic :- Civil Engineering Works and Building Works.

Based on a track record of the company's past projects that has been successfully completed and delivered to its many satisfied clients and coupled with the different experience acquired from each different project, the company has now accumulated sufficient experience which has been translated into well regarded expertise in the varies area of construction.

The company is now well placed to offer its services and delivery of quality works in all areas of construction and the company also expanding towards new and innovative horizons.

Triple H Construction & Engineering was established in 2012 with the aim of providing the finest workmanship and quality building to customer; mainly focusing in constructing commercial building and factory lots. We always placed utmost priority in workmanship excellence and take pride in achieving customer satisfaction with quality result. We believe that customer relationship is built to last, like how our quality material and building are made of.

Triple H Construction which is a CIDB G7 certified contractor in Malaysia. The company has more than 100 certified workers on site that are well trained in their expertise and in-house professional construction team As we always emphasize on quality materials and timely delivery, we have established a long term good relationship with our suppliers and partners with the sole purpose of providing the best to our customer.

Triple H Construction started from a humble beginning with our founder, Mr. Jimmy Chua being an apprentice in a construction company 26 years ago. Working at the lowest level has forced Jimmy to dirty his own hand and learn from scratch through hardship and determination. Accompanied by his shrewdness, he has accumulated abundance of experiences from various segment of the construction industry with the countless Civil and Building project he had undergone.

Triple H Construction a fine reputation in the construction industry. Since then, Triple H Construction extended their service by providing extension, repair and maintenance work, bringing yet another amazing feature of Triple H Construction to more business owner.

As a leading of engineering construction firm, we provide value by only construct quality product and service to customer consistently, therefore, instilling Triple H - High Quality, High Consistency, High Value as their driving factor to achieve their vision of being the most Trusted Customized Factory Builders of Malaysia

BRC Prefab Holdings Sdn Bhd (BRCPH), a wholly owned subsidiary of BRC Asia Limited, Singapore established since 1938 and listed in SGX (BEC.SI), was incorporated in Malaysia on 16th June 2011 to introduce and replicate the BRC model of Better . Faster . Cheaper Total Reinforcing Steel Solutions in Malaysia.

BRCPH operates out of a 9.2-acre manufacturing site in Senai, Johor. BRC's teams and factories in Singapore and Malaysia stand ready to assist builders in both countries with our full suite of reinforcing steel products which are designed with the project and builder in mind to maximize building speed and minimize manpower utilization.
